Art Unit: 3711

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, & 8-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Brown et al 2,733,885.

Brown shows a device including a series of tubular members 10, 11, 12, 13, having a reduced diameter at one end, and combined to be extended and retracted. A head cap 16 is at the large end, and end member 14 at the small end; the head cap has a locking projecting portion 18, which can be screw fitted to the head cap. Although Brown does not disclose that this may be used as a beating appliance for cheering, it includes all features claimed and could be used for this purpose with no structural change.

Claims 6, 7, & 15-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
